

# Flex N Stretch™

Elastic Hammock Packaging

at's *fragile* in your world

our family of Flex N Stretch™ protective packaging

ADE, Inc. 1430 East 130th Street, Chicago, Illinois 60633

**ADE, INC.**  
For What's Fragile in Your World

**SLINGSPRING - Window Pack**

The window pack was specifically designed to accommodate large pane glass windows, automotive windshields, screen doors, framed art, & other elongated fragile products. Each pack is customized to provide optimum protection for the specific product being shipped. One pack can often be used for several different, similarly sized, products.

**Simple 1-2-3 set-up reduces packing time!**

**SLINGSPRING - Specialty Packs**

ADE can design a pack specifically for your product's presentation and protection concerns. Custom materials such as bleach white board, anti-static board and film, plastic corrugated, and custom printing can be incorporated into a design. One piece construction is also available; combining cradle and carton into one unit for ease of use and storage.

**All-in-one packs save time and money!**

All FlexNStretch™ packs can be folded flat when not in use, significantly reducing warehouse space needed to store foam packs, bubble materials, and messy loose-fills.

FlexNStretch™ packs are designed to deliver the specific product protection that is needed without the storage, environmental, labor, ease of use or cost problems associated with traditional die-cut foam packs, molded foam packs, and instant-foam packs. Whether you're shipping laptops, PDA's, LCD screens, disc drives, circuit boards, glassware, windows, windshields, or any other type of fragile product, you can count on FlexNStretch™ packs to deliver the protection you need!

FlexNStretch™ packs deliver exceptional protection from damage due to shock, vibration, and surface abrasion encountered in normal shipping and handling. They are also easy to use and require no time consuming, complex set-up procedures in order to safely load and unload fragile products. All FlexNStretch™ packs utilize a hammock which is made from a durable, resilient elastic material that will continue to perform reliably despite repeated stretching, tears, or punctures.

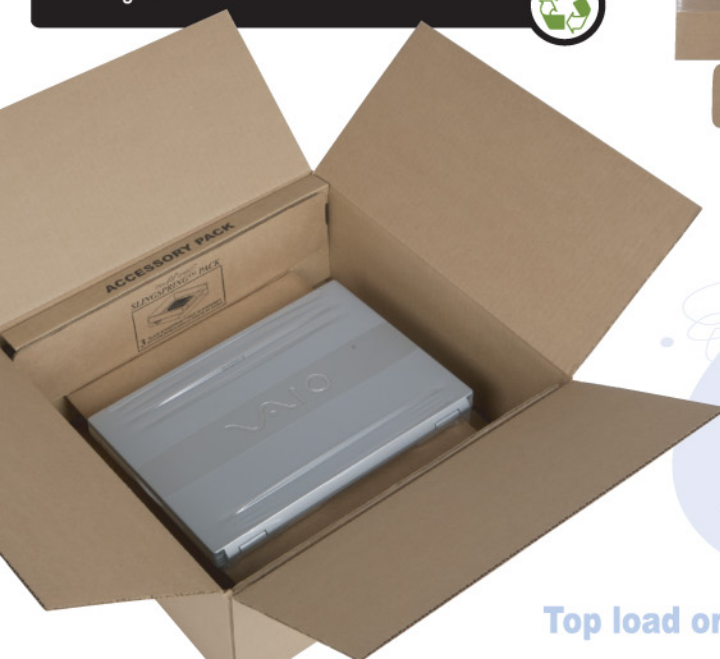

**SLINGSPRING - Laptop Packs**

ADE standard laptop packs can accommodate all brands and sizes of laptop computers. The Slingspring design is a patented packaging system that utilizes corrugated board and elastomeric film to protect the product from shock, vibration, and surface abrasion. You can be sure your product will ship safely and arrive undamaged.

**Stores flat!**

**Easy assembly!**

**Top load or End load available!**

**INCLOSURE Packs**

Inclosure packs provide excellent "block and brace" performance and adaptability. One Inclosure pack can accommodate a large variety of different sized and shaped products. These packs are also easy to use and store flat to reduce warehouse space.

**One pack for all, reduces inventory!**

**All FlexNStretch™ packs are reusable and fully curb-side recyclable!**

**Pack adjusts to height of product!**

## Ship with sophistication!

- windows
- windshields
- doors
- screens
- glass
- etc.

### **Customer Service Support:**

All ADE, Inc. packaging products are available worldwide. ADE, Inc. and ADE Authorized Distributors provide certification and training, delivery service and warehousing to ensure you receive the maximum benefits from every ADE product you purchase.

### **Package Product Testing:**

ADE, Inc. is a certified member lab of the International Safe Transit Association (ISTA) and is equipped to conduct simulated transit/handling tests on lightweight packaged products.

### **Patents:**

U.S. # 5,894,932 - 5,975,307  
6,920,981 - 6,942,101 - 7,150,356 &  
other patents pending.

### **Package Development Lab:**

ADE, Inc. has a fully equipped, on-site design and development laboratory. ADE packaging designers carefully analyze your product's vulnerabilities during assembly, handling, storage, and transit. Based upon evaluation of the complete system, an existing ADE design will be recommended or an innovative custom solution will be developed that will provide high quality packaging at the lowest cost-per-use.

### **Environmental Statement:**

ADE, Inc. is committed to developing packaging products that meet or exceed prevailing industry and government standards. All ADE products are RoHS and CONEG compliant. With overall source reduction as a consideration, FlexNStretch™ packs deliver satisfactory performance for multiple reuses.
